

Easy Standard Gennaker

North Sails Easy Gennaker made from standard measurements gives you the opportunity to acquire a North Gennaker at a very advantageous price.

As the name says, this sail is build for carefree sailing. It flies easily, is easy to handle, and needs less trimming than other brands. Combined with a North Snuffer you have the perfect solution for the small crew.

North Easy Gennaker is developed in our proprietary Gradient design-program and manufactured by our skilled sailmakers in a panel lay-out, which provides a smooth and stabile shape, fundamentally based on the same design and shape which Ameri-

ca's Cup- and Volvo Ocean Race boats benefit from.

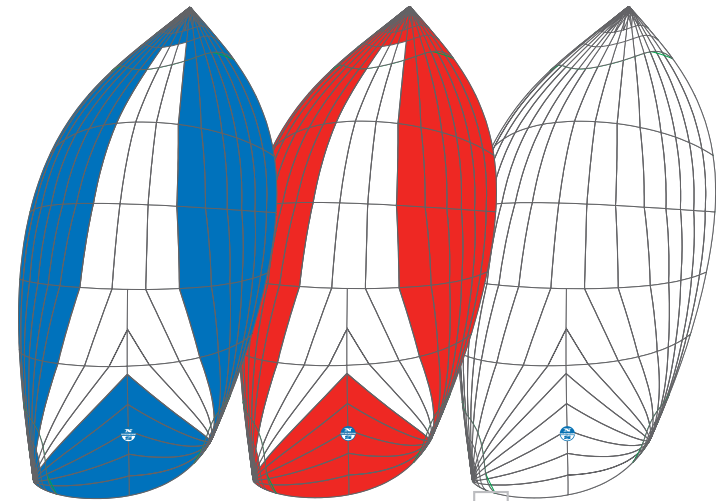

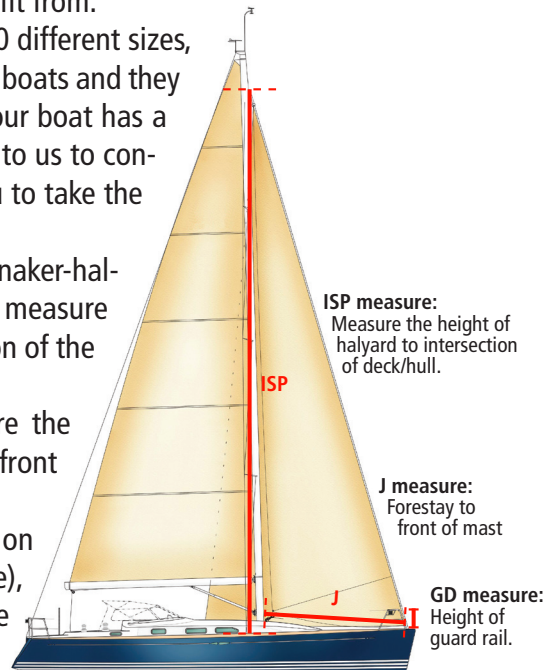

We manufacture the Easy Gennaker in 10 different sizes, covering the requirements of most standard boats and they are available in 3 colour-combinations. If your boat has a measurements certificate, please forward it to us to confirm measurements. If not, we will need you to take the following measurements:

ISP: Attach the measuring-tape to the spinnaker-halyard, hoist it as high as you can and measure from top of the mast to the intersection of the deck.

J: Measure the distance between where the forestay intersects with the deck to front of the mast or

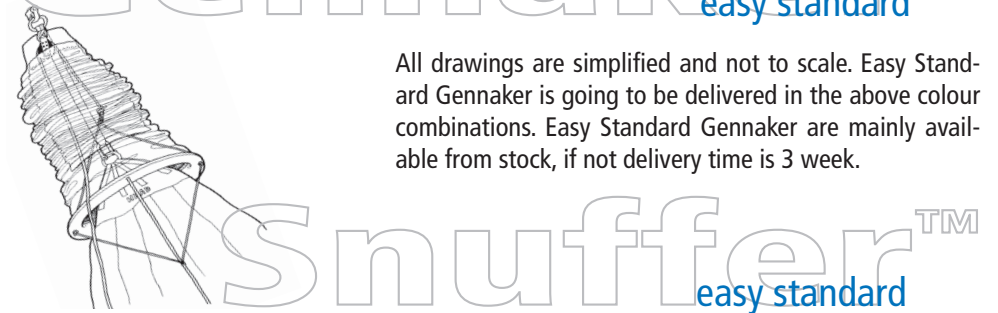

TPS: Measure the distance from the point on the bow (or bowsprit, if applicable), where you will attach the tack of the Gennaker to front of the mast.

GR: And finally we need the height of your guardrail.

Gennaker™
easy standard

All drawings are simplified and not to scale. Easy Standard Gennaker is going to be delivered in the above colour combinations. Easy Standard Gennaker are mainly available from stock, if not delivery time is 3 week.

Would you also like the advantages of the North-Snuffer, please let us know when ordering, as it affects the luff-length of the Gennaker.

Contact us with these measurements and we can supply you with a Gennaker that fits your boat and will make your downwind sailing even more joyfull.

26	8,20	37	9,00	7,50	4,50	£ 525,00		£ 230,00

Prices are exclusive VAT and delivery. Prices can be changed without notice. Please call and check. If necessary a 60 cm tack line with eye splicer and a Wichard hook can be supplied for the price of £ 45,-

All drawings are simplified and not to scale. Easy Standard Gennaker is going to be delivered in the above colour combinations. Easy Standard Gennakers are mainly available from stock, if not delivery time is 3 week.

How to calculate the Gennaker luff length.

Square root of $(ISP^2 + J^2)$ = Length of forestay (Tmax)

Forestay length (Tmax)

- Minus the height of the guard rail. (app. 60 cm.)
- Minus Snuffer (app. 30 cm.) if any.
- + Plus 8 %
- = Equals luff length of Gennaker.

ISP: _____ m.

Tmax: _____ m.

Height of guard rail: _____ m.
